

To whom it may concern

As you know, we are applying to have our temporary side patio become a permanent area at Parkside. We are appreciative of the support during the pandemic to allow for this increased area, and we see it as a positive long term addition to our brewery and for our guests.

The biggest benefit we see is to support having a more “spread out experience” for our patrons, and more table space overall outside, where the seating is most popular. While we loved the feel of parkside pre covid when it was “standing room only”, we believe guests will still want some separation post covid. It also allows us a flexible outside area with weather protection on days with some rain. Again, the benefit here is that we can have more guests seated and an overall better and more comfortable ambiance.

We are excited to continue contributing to what is becoming a vibrant social area in Port Moody, and we see this as a great step forward!

Thank you for your consideration
